How Waze partners with cities on data sharing

Under the Connected Citizens Program, participating cities and states get filtered data based on aggregated traffic information Waze collects from their communities of drivers.

Agility training for responder drones

To ensure that emergency response teams using drones can all perform basic maneuvers, NIST has developed test methods that measure both the capabilities of drones and the skill of their pilots.

A 10-year march toward quantum computing

A quantum computer that can crack today's state-of-the-art encryption algorithms is more than a decade off, according to the National Academies.

How to get beyond AI myths

To successfully maneuver a change as complex as AI implementation, organizations should lead with a human-centered approach.
